The following is the policy statement of the District as it regards to the natural tree protection, wetland and upland buffer areas that are scattered in large numbers throughout the District. The policy statement is consistent with the policies of other governments including Osceola County and the Southwest Florida Water Management District (SWFWMD) as it regards their natural, conservation tree protection and wetland conservation/preservation areas:

The natural areas are not intended to be maintained. These areas are to be left untouched to allow for nature to take its normal course. Vegetation that dies including, but not limited to, trees, are left to fulfill their role in nature's process.

Trees, within or immediately adjacent to these areas, that have died and appear to pose a threat of falling and damaging an abutting property owner's property may be addressed by the abutting property owner after securing permission to remedy the situation from the District and all required permits from all authorities having jurisdiction including Osceola County and SWFWMD. Such abutting property owner must initially contact the District for permission to address the removal or remediation of the threatening situation and shall then be responsible for any needed permitting or review by Osceola County and/or SWFWMD. Permitted trimming and/or removal, where warranted, shall be done at the expense of the abutting property owner. The goal is to minimize disturbance these areas.

In the event that a tree does fall onto another's property, that property owner has the right to cut back or limb the tree as necessary to their individual property line. The rest of the tree is to be left as-is. This would also pertain to normal maintenance, which would allow an owner to trim back any encroaching vegetation to their property line. No one is allowed to encroach into the nature areas for any reason, from maintenance to placement of personal property, of any kind.
